

Why you should use JonDonym...

Anonymous surfing

While surfing the web you leave small pieces of yourself behind. By combining these traces they get a face - your face. Big businesses, hackers, security services take advantage of these profiles.

"JonDonym makes you invisible"

Secure Surfing

On public data networks such as Wi-Fi hotspots, cyber café's, hotels, and airports, data thieves can easily spy on your connection.

"JonDonym protects you"

Blinding big brother

As a result of stronger interference by government more and more personal information is being stored.

"JonDonym gives you back your privacy"

Free access to information

In many countries, e.g. China, access to information is limited by censorship.

"JonDonym overcomes limits"

Freedom of speech

Around the world, people cannot blog, facebook, youtube, or recently wikileaks afraid of imprisonment.
